MD TAUHIR ANSARI

Ghaziabad,
Uttar Pradesh, India

EDUCATION:

- **Raj Kumar Goel Institute of Technology, B.Tech, ECE** (2018 - 2022)
 - CGPA: 6.8% (Up to 7th semester)
- **Pt. JNS Intermediate College, Renukoot**
 - Uttar Pradesh Board of Education (UPBOE) - 68.8% (344/500) (2018)
- **Aditya Birla Intermediate College, Renukoot**
 - Uttar Pradesh Board of Education (UPBOE) - 72.5% (425/600) (2016)

LANGUAGES AND TECHNOLOGIES :

Programming Languages : JavaScript, Python , C, TypeScript

Frameworks & Libraries : Protractor (E2E Automation), Flask, Django, Laravel, Spring Boot, jQuery, Pandas, scikit-learn, NestJS, TCP/IP

Web Design : HTML5, CSS3, SCSS, UX/UI

Database : MySQL, MongoDB, PostgreSQL, File Storage(CRUD)

Version Control : Git

AWS Services : Lambda, Chime, API Gateway, Amplify, EC2, S3, RDS, CloudFront, Secrets Manager, SNS, SES

PERSONAL PROJECTS :

1. **Titanic Dataset prediction using Machine Learning algorithm**
https://github.com/Taukir016/Titanic_SurvivalPrediction.git
 - Prediction of how many people are survived in Titanic ship and ratio of remaining persons man and woman
 - Splitting data into training set and dataset then create a model using Logistic regression.
 - In addition to that, Check the accuracy of training set and test data.
 - Datasets were collected from Kaggle, and scraped from Wikipedia. (**Utilized:** Python, numpy, Pandas, Matplotlib, Machine Learning Algorithm)
2. **Covid-19 Effect Analysis** <https://github.com/Taukir016/Covid-19-Prediction.git>
 - A simple analysis to check the status of coronavirus worldwide.
 - Check prediction of total confirmed death in Indian nation and how many persons are recovered
 - Spreading the corona virus world wide and show that on map using ggplot. (**Utilized:** Python, numpy, Pandas, Matplotlib, ggplot, folium)
3. **Portfolio Website using Django** https://github.com/Taukir016/django_Portfolio_Website.git
 - Make a portfolio website using frontend tools and for backend use python Django module.
 - Website application developed using MEAN stack with authentication enabled and password encrypted
 - Use Paypal Api for create a payment gateway (**Utilized:** Python, django, Html, CSS, JavaScript, Bootstrap)
4. **Student Administration System** https://github.com/Taukir016/Student_Administration_System.git
 - A Simple Python GUI Application to store information of students in database.
 - Perform CRUD operation in this project and changes are updates in MySQL database. (**Utilized:** Python, Tkinter, MySQL)

ACCOLADES:

- Participate in Online Coding competition Code The Code and secured good position.
- Member of the organizing committee of 'Light de Literacy' social works by Raj Kumar Goel Institute of Technology
- Attended Workshops on Leadership talk with Abhay Jere at MHRD, India
- Got appreciated for my contribution towards a project I worked on by nominating me for the Spot Award

CERTIFICATIONS

- | | | |
|--|--------------------------|-------------------------|
| 1. PYTHON FOR DATA SCIENCE with A+ Grade | - DUCAT, Ghaziabad | (Jan 2020 - Aug 2020) |
| 2. Machine Learning (SPECIALIZATION) | - Deeplearning.ai, Udemy | (July 2021 - Aug 2021) |
| 3. Fundamental of Digital Marketing | - Google | (April 2020 – May 2020) |
